Math-a-thon

Calling all

Mathletes!

Thursday, April 14th

8:30 a.m. - 1:30 p.m.

Today is the day we have been training our brains for! The Math-a-thon! You are all amazing mathletes and will be successful! You will be called with your team to the gym sometime from 8:30 to 1:30 and will be given the chance to show your stuff!

We are still looking for several parents to help.

Please call or email me:

Mrs. Marnocha

915-5379

Students

Math facts

As we get ready for the Mathathon we need to practice. We are mathletes of the highest thinking kind!

Our brain is a muscle just like the muscles in your arms and legs and needs to be strengthened and stretched!

See if you can pick out 2 worksheets to bring home and practice with. This isn't required, but will help you practice.

The worksheets are in the back of our classroom. You may work with a friend. Please only take 2.

Good luck mathletes!

Parents

Our family likes to read. Are there any good books that make math part of the story?

Math turns up in the most unexpected places! You'll find it somewhere between the covers of almost any book-novels, mysteries, biographies, legends, and adventures.

For ideas on how you and your child might talk about the math you discover in books you read, look over the selections in this brochure and the questions that follow below them. But they're only starters.

You'll soon start finding the math in everything you read. Talking about it is one more way to bring your family together. Enjoy!

Doing mathematics as you read literature is a real possibility if you choose the right books. The following passages from contemporary literature, and the accompanying questions, can give you some ideas on how to mix math and your reading.

Holes by Louis Sachar

"Instead of twenty-six letters. There are really fifty-two." Stanley looked at him surprised. "I guess that's right. How'd you figure that out?" he asked. Zero said nothing. "Did you add?" Zero said nothing. "Did you multiply?" "That's just how many there are." "It's good math," said Stanley. "I'm not stupid," Zero said. "I know everybody thinks I am. I just don't like answering their questions."

- How many letters of the English alphabet are there?
- Why did Zero say there are 52?
- What type of reasoning is being used?

Have fun reading about math!
Mrs. Marnocha

Things to remember

Mathathon

Thursday, April 14th
8:30 a.m. - 1:30 p.m.

Parents and friends,
if you are coming in
let us know!

Math Facts

When do you use
your math facts such
as addition or
subtraction? Look
around! In the store?
At the gas station?
Where!?!?!?

Summer School

Now is the time!
Register for fun
classes during the
summer. Please call
the AASD @ 920-
738-0744 to sign up
today!

Activity for you!

Students and Friends,

Here is an activity for you to do with a friend or on your own.

Practice. Practice. Practice. This will get your brain ready for the Math-a-thon!

See if you can do these in your head!

$6 + 8 = \underline{\quad}$

$9 + 3 = \underline{\quad}$

$4 + 1 = \underline{\quad}$

$8 + 1 = \underline{\quad}$

$7 + 5 = \underline{\quad}$

$5 + 7 = \underline{\quad}$

$5 + 1 = \underline{\quad}$

$5 + 3 = \underline{\quad}$

$9 + 1 = \underline{\quad}$

$2 + 9 = \underline{\quad}$

$6 + 4 = \underline{\quad}$

$1 + 5 = \underline{\quad}$

$9 + 5 = \underline{\quad}$

$7 + 3 = \underline{\quad}$

$3 + 3 = \underline{\quad}$

$7 + 7 = \underline{\quad}$

$7 + 9 = \underline{\quad}$

$4 + 3 = \underline{\quad}$

Do this with a friend!

Turn this in to Mrs. M

Please bring this back to Mrs. M so we can look at it together. You can do it on your own, with a friend, another teacher or adult!

We did so well last time, so if we get back 15 back this week - 15 extra minutes of play!

YOU ARE ALL DOING SO WELL! ONE MORE TIME BEFORE THE YEAR IS OVER! LET'S DO IT!
